

## Product Data Sheet

# COSMEDIA® SP

### General characterisation

#### Chemical description

Acrylic acid homopolymer, sodium salt

### Labeling information

#### INCI name(s)

Sodium Polyacrylate

### Registrations

Ingredient	CASR-No.	EINECS/ELINCS-No.
	9003-04-7	Polymer

### Officially listed in / Quality conforms to

### Product properties

#### Appearance

White flowable powder

#### Example of use

Cosmedia® SP is an emulsifying polymer with stabilizing, thickening as well as emulsifying properties for personal care emulsions.

### Characteristic values

The specifications stated in the paragraphs 'Quality control data' and 'Additional product descriptive data' finally and conclusively describe the properties of the Product.

### Provisional quality control data

(Data which is used for quality release and is certified for each batch.)

Appearance	conform to standard	
Odour	conform to standard	
Dry matter	min. 88 %	ISO 1625
Viscosity (1% in water)	85000 - 110000 mPas	ISO 2555 (mod.)
pH (1% in water)	5,5 - 6,5	NF EN 1262
